The Western Economic Outlook

Writing in "Agricultural and Industrial Progress In Canada," Mr. John F. Sweeting, Industrial Commissioner, Western Lines, Canadian Pacific Railway, declares that confidence in the outlook for 1934 business is the dominant feature of the Western situation. Signs are not lacking in many parts of Canada that we are slowly emerging from the depression of the past four years. Improvement appears to be more noticeable in the Eastern parts of Canada, where some acceleration is apparent in the manufacturing industries. In the West where we depend almost entirely on agriculture, recovery will necessarily be more slow in coming. As a matter of fact we cannot hope for any great degree of prosperity whilst agriculture languishes. A good crop, fair prices for our wheat, and a market for our products are the needed factors. Mr. Sweeting says that improvement in trade, together with the realization that an upturn is now noticeable, has brought back the more satisfactory feeling that it is possible to consider that a period of trade and industrial expansion is, to a moderate degree, justified. Anticipated during the last few months, it is not difficult to venture the statement that every effort is being put forth to increase the volume of business throughout the West by methods that are most likely to react favourably.

It is, of course, too early to state what programme of new development is likely, though enquiries towards the end of last year appeared to indicate that some industrial expansion of note might take place during the present year, and that there may be more money available for building operations of all classes. In this relation, there should certainly be a distinct improvement over 1933 if necessary requirements are to be met in the erection of houses and commercial buildings, quite apart from any factory expansion. Any programme of moderate size would soon improve the lumber market, which has been nearly at a standstill for some time, though the export business has been showing important increases.

The mining industry is looking for a steady improvement, and activities in relation to development would show a confident outlook in this respect. In British Columbia, Manitoba and western Ontario work continues on an increasingly larger scale, which will bring some important properties into production during the present year.

The Western agricultural situation is a matter of constant study of ways and means to bring it to a more stabilized level, but, in the meanwhile, the Western agriculturist is bent on carrying on with ever-improving methods in the production of grain and livestock, having in view that ultimately his returns will justify confidence in Western Canada and its products. This is considered to be a reasonable attitude that will eventually realize greater value for farm products, more especially as the major effort is towards a higher standard that will meet export market requirements. This work is already showing results that further the belief that the correct course is being followed.

In Alberta and to some extent in Saskatchewan and Manitoba, drilling for oil and gas is to be continued. The Alberta programme is to be of considerable size, according to present indications, the more southern field getting the larger share of the proposed operations.

The sodium sulphate industry of Saskatchewan increased its production during 1933, and it is anticipated other deposits will be brought into operation during the present year. The clay areas of southern Saskatchewan will cause interest, awaiting further development at such time that capital and power markets are available.

The fishing industry of the inland lakes of the three Prairie Provinces is being fully investigated in order that the marketing of the products of these lakes may possibly be put on a better footing, and efforts are being made to expand the marketable areas for whitefish, as well as for other classes of fish that are available in large quantities from the fresh water lakes of the West.

Report Finding Of King Solomon's Mine

Saw Dreams Realized

late Walter Wellman Made First Attempt To Fly Atlantic

The death of Walter Wellman in New York vividly-recalled to others in Chicago the long, anxious days in 1906, 1909 and 1910, when they waited for news of the audacious attempts of the aviator airman to reach the north pole and to cross the Atlantic ocean in a lighter-than-air ship. Four times the audacious newspaper man tried to reach the north pole, twice on foot, twice by airship. He was the first man to attempt to cross the Atlantic by air. In Solomon's day it was said to be so fabulously rich in gold that silver became of little value in his court. The search has gradually narrowed down to an area of about 250,000 square miles. Arthur tortured many natives in an effort to extract information about it and many Portuguese tramped hundreds of miles in search of it.

Large Enough Anyway

Elephants as security were recently offered by an American showman, who asked for a government loan to rehabilitate his broken-down circus. The security he offered was a mortgage on three elephants.

Cleveland is probing a poorhouse whose books show 24,000 gallons of gas used in 11 months in six small cars. Someone must have cleaned a tie.—Detroit News.

Shortness of Breath
Weak, Sinking Feelings

Marvels of the Human Eye
By F. M. CROWE, Optometrist-Optician, Calgary

NO. 3—CATARACT

Much ignorance exists as to what a Cataract really is. A great many people think it is a growth of some kind on the surface of the eyeball which can be seen with the naked eye—but such is not the case.

A Cataract is that condition of the eye in which the Crystalline Lens has, from various causes, lost its former transparency thus preventing the rays of light from passing through it unobstructed and focusing a clear image on the Retina. This loss of transparency usually progresses very slowly. Sometimes it starts from a single point or nucleus and gradually spreads throughout the whole Lens in which case the entire Lens is involved in the same time. In the latter case it is very difficult, even for an expert with instruments, to recognize it in the early stages but as and when it continues to progress, the Lens becomes more and more opaque and the image on the Retina becomes more difficult to observe (with instruments) and finally when the Cataract has become "ripe," the pupil instead of being black, is grey, which can be seen by anyone without the aid of instruments.

That condition then, in which the Lens has become cloudy is known as a Cataractous Lens or Cataract and glasses seldom offer much assistance. In fact, as the condition changes, the eyes will become more and more frequent changing of the glasses until eventually the Lens having become so convex, the effect of the convex glasses formerly worn is neutralized and such people can read better than those who wear glasses of lesser degrees than with these formerly worn and this is how the false idea of "second sight" originated. There is no such condition in normal life as "second sight" and such an apparent experience was or is due to the fact that the eyes are not able to make much use of the image on the Retina and the eyes are not able to see well without glasses although he formerly had to wear them, hence he must have got his "second sight".

In this place such people have no means of knowing the percentage of normal vision such a relative possessed at any time of life and the only foundation for this statement is that the relative before death could see better without glasses than with them, the explanation of which I trust I have made clear. Do not hope that you will ever "get your second sight".

One eye, both eyes are simultaneously affected through the opacity appearing in one Lens years in advance of the other but eventually both eyes become diseased.

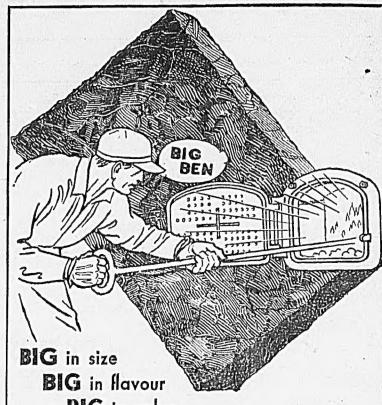

When the Cataracts have become large the patient has difficulty in distinguishing between friend and foe,

and in proportion to the progress of the disease, dimness of vision follows for which glasses are of little or no avail. Patient sees as if he were in a fog or as if a film is before the eyes. He usually has an aversion to bright light and prefers a dark or cloudy day because he sees better and more comfortably. Cataracts do not cause any inflammatory condition to the eyeball.

Technically there are several varieties of Cataractous Lens. There is the Spherical due to extraction of old age but fortunately few even very old people are afflicted. Injury to the eyeball at some time of life is a common cause while certain diseases of the body have a tendency to produce it. Diabetes is a good example.

There is no medicine, exercises or other "cures" for Cataracts although much money and time, with resultant sorrow, have been spent by people who have fallen into the hands of quacks (fakir) who have published claims of nostrums or "magic glasses". Surgery, performed by a skillful operator, when the Cataract is "ripe" is the only solution and when the opaque Crystalline Lens has become so large that it obscures the eyeball and proper glasses supplied there is nothing to prevent the rays of light from passing into the eye and focussing on the Retina and very often one hundred per cent vision obtainable.

European Travel Costs Lower

Reduced Railway Fare As Well As Hotel Rates

Contrary to a wide-spread impression, European travel costs this year, despite foreign exchange rates, are actually lower than they were in the peak travel year of 1926, according to the Cunard & Anchor-Donaldson Lines.

This fact is revealed in the inclusive tour costs of the big travel agencies and the reduced fares on railways, automobiles and hotels. Private automobiles can be hired at a much lower price, the costs being reduced by 44% in Paris and in Rome by 46%, with comparative reductions in other countries.

Hotel rates average 36% less all over Europe than they were in 1926. In Paris the reduction is 33%, in London 21%, in Nice 26%, in Genoa 66%, in Rome 50%, in Naples 60%, in Lucerne 33%, in Interlaken 40%, in Heidelberg 25%, in Cologne 35%, in Amsterdam 41%, and in Brussels 23%.

Railway fares have been lowered in many countries. In Holland, for instance, the reduction has been as much as 22%, in France 30%, in Poland 25%, in Switzerland 30%.

Taxis have come down considerably; in Amsterdam, for instance, a taxi ride, regardless of the distance covered, costs you only 27, half as much as in 1926.

Organized sight-seeing tours in Europe are considerably reduced. In Paris, they are 25%, in Nice 28%, in London 14%, in Brussels 22%, in Rome 25%, and in Heidelberg 37% less than in 1926.

These reductions more than offset any unfavourable effect of high exchange operating in some countries.

Most Intelligent People

Dr. Rudolf Pintner, psychology professor at Columbia University, has found that persons born in January, February or March are inclined to be less intelligent than those born later in the year. He bases his conclusions on studies of 20,000 school children.

Farmers of the Netherlands are welcoming the payments by the government from its agricultural crisis fund.

To Assist Livestock Industry

Want Reports On Detrimental Practices Of Livestock Buyers

To assist him in the presentation of the important information respecting the livestock industry to be submitted by joint representation of the government of the prairie provinces, Hon. W. C. Buckle, minister of agriculture for Saskatchewan, is desirous of having farmers interested in the production and marketing of livestock, report any specific example of where the producer is not the recipient of full market value for his livestock due to detrimental trade practices or other defect in the present system of marketing livestock.

All statements should be accompanied by documentary proof. Opinions are valuable when based upon facts, but without them are useless in a case of this kind.

It is expected that joint representations from the prairie provinces will be submitted to the Parliamentary Committee, Ottawa, very shortly. The Livestock Associations and the Livestock Pool, have been invited to present available data to Hon. Mr. Buckle to be incorporated in a joint statement on behalf of the three prairie provinces.

Spreading eyes and smiling lips speak of health and vitality. Clear skin reflects health. The health aspects of the prairie people are both happy and popular.

A Streamlined Bullet

War Office Experts Taking Keen Interest In Tests

A new streamlined bullet was tested on the Biseley ranges recently, in which war office experts are taking the keenest interest. Skilled riflemen showed that they could place shots on the target within two feet of each other at 1,000 yards and the wind had 25 per cent. less effect on the bullets than on the old-style bullets. The new bullet has a range of more than 5,000 yards as against the 3,000 yard range of the old bullet. It is made of a secret alloy.

OPTIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart. Peter is a young advertising man, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is a laundress by inheritance when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is Peter's love; Peter's Spyke, Todd Peters' model, and Gus Matson, his former roommate with whom he has quarreled. At a party at an exclusive club Peter encounters Camilla, quite with impressions. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off the bandwagon and fall asleep on the sand. When they awake it is early morning and Avis and another boy are at the party. This is the reason it is necessary for Camilla to leave. She and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has obtained some of her work, fire her and tell her they have a new account which requires unusual treatment of jewelry art. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of \$500 a week, to accept and develop of having a scholarship. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained the job and goes to the house of the new household. Avis Werth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly but is favorably impressed with her visit. She urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel.

(Now Go On With The Story)

CHAPTER XXXVIII.

She remained with him for another hour, striving to find the magic word or gesture that would break this spell of their disengagement, but he remained aloof and impersonal. There was no ecstatic hour of murmured endearments and close embraces, while they discussed their work and hopes and plans. There was no deeply poignant meeting of blue and brown eyes, eloquent with wordless meanings.

She might have been any girl who had stopped in and interrupted his work, any girl whom he would have entertained with desultory words and a not too gracious manner—except for the first ten minutes which had been followed by their ugly quarrel.

Their farewell was like an act in a play which they had rehearsed too many times to find exciting any more, and Camilla walked out into the mellow autumn sunshine, seeing nothing, oblivious of sounds and feeling paralyzed. She avoided traffic by instinct and boarded the right car from behind. Nothing mattered.

Horward had turned upside down. She and Peter had said unkind words to each other; their eyes had avoided each other's in shame instead of meeting with sympathy. Somehow they had lost that precious, happy intimacy which had made any hope possible and every denial a promise. Her eyes stared out the window at the passing landscape. Buildings, houses, trees, lamp posts, were blurred like a photograph that was badly out of focus. No object was distinguishing.

When Camilla had gone, Peter sank into a chair and dropped his head into his hands. In his gesture was all the weariness and despair of his whole past. Never had life seemed so futile and ambition such a mockery. He might have known it would be like that, he told himself bitterly. Camilla had made practical use of her talent, and within a few weeks was offering to take care of him. He was a dreamer who couldn't even take care of himself.

He believed it was his pride that was hurt because he couldn't support the woman he loved, but it was just common human jealousy which gnawed in Peter's mind. Only the deadly poison of jealousy could so distort both love and pride. But the most malignant factor in jealousy is that it cannot be admitted, and therefore is difficult to cure.

The more Peter brooded over his situation, the more his anger grew, and his wrath settled upon Camilla because she was the object of his jealousy and of his overwhelming desire to succeed at the same time.

A light knocking at the door startled him violently, as deeply wavy hair sank into the absorbing quicksand of despair. He aroused himself with an effort and thought, "Camilla has come back to try to make it right. Well, she can't. I'm sick of it all."

The knocking was repeated, more imperative. He called crossly, "Come in."

The door opened and his hostile eyes met the pleasant greeting in Avis'.

"Hello, everyone," she called cheerfully, then stopped with an inquiring glance around the room. "Oh, I thought Camilla was here. I ran in to ask you both to have a little supper with me. I'm alone — and lonely." She laughed, without sincerity. " Didn't I hear her come in early this afternoon?"

"Yes, she was here," Peter replied tonitiously, and added, "but she had to leave early."

"Well, it's a good thing I came over in time to pull you out of your gloom. Another half hour and you would pass out." Her bantam concealed her own suspicions of the situation and her good humor encouraged Peter. "All the more reason, then, why you should have supper with me, anyway. That's just one of the disadvantages of having a genius for a wife. Of course, she can't afford to spend all her time chirping you up."

"Oh, I'm all right," he insisted, smoothing back the bright, disordered curls with a big, shapely hand.

"Tired, I guess."

"Of course, you are. You're worked all day, haven't you? Come along."

He obeyed meekly. Following Avis across the hall had got to be something of a habit. Rather a pleasant habit, too.

Avis was a clever actress. To prove that she had anticipated two guests for supper, she removed one of the plates from the table that was laid for three. She also talked easily and sparingly while she served Peter unobtrusively. Here was a "rift with the late" of Peter's marriage, and she drove her wedge in cautiously. She restored his tranquility, made him comfortable and entertained him quietly. Just what he wanted.

When they left the table, Avis suggested without insistence, "You surely don't need to work tonight. You should rest. Sit down and be comfy for awhile. Is your pie almost finished?" She turned the volume low on the radio, and a sentimental voice crooned, "You take me to Paradise." Then she lit a cigarette and held it to his lips. He took it with an amused laugh. She fired another for herself and dropped down lightly on the opposite end of the divan, arranging the pillows for her comfort.

It was strange how Avis, served and pampered and indulged, found her greatest pleasure in serving and humoring this young giant who looked as if he had been made to struggle with physical force instead of molding bits of clay. The ignominy of that—makes servants of parasites and weaklings of slaves.

She blew smoke into space, with contentment. "Yes, I'll finish this week. I had planned to have it bronzed before sending it to the exhibitor," pensively.

"Of course, you should. Why not?"

"That costs money," he replied, after a moment's hesitation, and met her glance defiantly. "So, I'll eat it as it is."

"Don't be absurd," she reproved him gently. "What's a little saving

like that, if it hurts your chance to win?"

"Can't save what I don't have," enigmatically.

"Well, wouldn't it pay you to borrow money on a chance like this? Besides, supposing that you don't win the prize, you can put it into marble and sell it as you suggested before."

He made a gesture of hopelessness. "Who is going to loan me money to a fellow who has made a clay figure, on the chance that he will win a prize or that he might copy it in marble and perhaps sell a buyer for it?"

That's all the collateral I have to offer. Did you ever hear of a financier who would take such a long chance as that?"

"A better guarantee would be your talent and ambition," she suggested.

He laughed ironically. "Who would believe that I had anything so valuable as that?"

"I know you have." Her eyes held his gaze, significantly.

"Oh—that!" he dismissed the implication of her words, instantly. And added presently, "Funny how the women insist upon taking care of me. What's the matter with me, anyway?"

"I know you have." Her eyes held his gaze, significantly.

Mrs Fred Lajoie and baby visited at the home of Mrs. R. Whelan on Monday.

Donald Guss spent the week end at Munson visiting with his brother Jas. Guss.

Mrs U S Petersen left Tues for Arlstad, Minnesota where she will visit with her mother who is 95 years of age. Mrs. Petersen received word that her mother, Mrs. K. Kaland, was very ill. She will also visit at the home of her brother O. L. Kaland.

Mr. A. J. Mumford who spent the winter months at Winnipeg, Man., returned to Chinook on Tuesday.

Mr. Carlsen who purchased the Lensgraf farm, spent the winter months at Ainswright, returned this week.

Start Spring Work

Considerable work is being done on the land in this district and seeding will be under way shortly. No growth of weeds have occurred yet and many will wait for the first growth before starting seedling operations. The soil is in good condition due to snow that fell during March. Many places are too wet to work on the land yet.

Mrs K. N. Myhre moved this week into the house owned by her daughter, Mrs. Flater.

Mr. and Mrs. Scott, of Oyen were Chinook visitors on Friday.

Robert Harrington, son of Mr. O. D. Harrington, of Big Stone district returned from Ouds on Saturday, where he has been attending the School of Agriculture.

Born - To Mr. and Mrs. S. Squine on Thursday, April 5, a son.

Miss Lillian Cornell is spending a few days in town visiting with Mabell Gibeston.

Mr. E. Blagen, mail carrier moved to the farm formerly occupied by Bert Currey, situated about four miles north of town.

Miss Mae Tood along with Mrs. McLaren and Miss Leo Desmond, of Oyen, and Miss Melinda Long, of Cereal, returned Sunday night from Calgary where they spent the Easter vacation.

Mr. Dafoe, superintendent of Mills Elevator Co., was a business visitor in Chinook Wednesday of last week.

Carnation Milk, 5 for 25c	Coffee, red seal, 2 lbs. 50c

No Real Drouth In 1934

Forecaster Gives Outline of Critical Crop Weather For Coming Season

"There is an ancient aphorism to the effect that it is the weather of the year which causes it to be a fruitful one or not at all any combination of the year or soil. This was expressed by the Roman poet, Virgil, in his famous phrase, 'annus fructifer non nullus.' That is, it is the year, not the soil, that is fruitful. So certainly, in this weather, conditions above all things else determine crop yields, that we can predict with great confidence that any field crop in this country which fails to receive the proper amount of rain will be below the normal in quality and quantity.

During an average season from May to October, the rainfall is likely to be fully satisfactory, however, most all crops will thrive very well if there is any normal, near normal sunshine, and no excessive heat. The weather is not so certain to be sufficient or to come at the critical time, and it therefore becomes necessary in order to secure best results to plant at such a time as will bring the critical growth period as close as possible to the seasonal peak of rainfall. To afford some help in this regard, the following estimate of the periods has been prepared for the three most critical crop weather months.

For May 1934 in the regions which we commonly call the southwest, Kansas, Oklahoma, Texas, the Colorado plateau and east to the Mississippi river, the forecast shows increasing moisture, that is, it should be more abundant than normal and the parts month being wettest. About May 4 to 6, 10, 15, 18, 23 and 30 are the most probable dates of rainfall. In the month and the critical period of the Mississippi, allow about one day earlier for each of these dates. For June, increasing rainfall, most likely dates being June 2, 5, 8, 11, 14, 20, 24, 28, 30, etc. The added date is the 1st of July. In July a sudden spell after the 1st, then heavier rains are expected about 9, 18, 24 and 31.

For May in central regions of the United States, including Nebraska, the Dakotas, Minnesota and central Canada, fully normal rains are expected up to about the middle of the month and then to be quite dry weather and at times too dry. The rainiest dates are May 3, 6, 12, then only light, scattering showers about 1, 9, 13, 18, 20, 23 and 31. In east one day later.

No real drouth is expected in 1934 although a few dry spells are forecast from about the middle of May to the middle of June, yet broken by notable rains near May 23 and June 2.

The northern United States, or east central region, the critical rainfall may be slightly deficient in some parts, but not amounting to drouth conditions.

WINNIPEG, April 1. — The Manitoba legislature early today adopted a resolution urging a minimum price for wheat handled by the wheat board it is proposed to establish under the wheat bill. It calls upon the government to guarantee to the farmer a minimum of 63.02 gold cents per bushel, the equivalent of \$1.03 3/4 in Liverpool, or 90 cents at Port William in Canadian funds, during the period of the wheat agreement.

Saskatchewan and Alberta are asked to endorse the resolution.

Crocus Lodge Holds Farewell Party April 4

After the regular meeting of Crocus Lodge A.F. & A.M., on Wednesday evening April 4th the members, and their wives, several visitors from Acadia Lodge at Youngstown spent a social evening in honor of Mr. and Mrs. J. W. Lawrence who are leaving for Red Deer. Bridge was played for a couple of hours, after which lunch was served. The members of Crocus Lodge presented Mr. and Mr. Lawrence with a beautiful silver rose basket. After a half hour of speeches and singing all joined hands in singing "Auld Lang Syne." We all join in wishing Mr. and Mrs. Lawrence much prosperity in their new home.

The Western Economic Outlook

Writing in "Agricultural and Industrial Progress In Canada," Mr. John F. Sweeting, Industrial Commissioner, Western Lines, Canadian Pacific Railway, declares that confidence in the outlook for 1934 business is the dominant feature of the Western situation. Signs are not lacking in many parts of Canada that we are slowly emerging from the depression of the past four years. Improvement appears to be more noticeable in the Eastern parts of Canada, where some acceleration is apparent in the manufacturing industries. In the West where we depend almost entirely on agriculture, recovery will necessarily be more slow in coming. As a matter of fact we cannot hope for any great degree of prosperity whilst agriculture languishes. A good crop, fair prices for our wheat, and a market for our products are the needed factors. Mr. Sweeting says that improvement in trade, together with the realization that an upturn is now noticeable, has brought back the more satisfactory feeling that it is possible to consider that a period of trade and industrial expansion is to a moderate degree, justified. Anticipated during the last few months, it is not difficult to venture the statement that every effort is being put forth to increase the volume of business throughout the West by methods that are most likely to react favourably.

It is, of course, too early to state what programme of new development is likely, though enquiries towards the end of last year appeared to indicate that some industrial expansion of note might take place during the present year, and that there may be more money available for building operations of all classes. In this relation, there should certainly be a distinct improvement over 1933 if necessary requirements are to be met in the erection of houses and commercial buildings, quite apart from any factory expansion. Any programme of moderate size would soon improve the home lumber market, which has been nearly at a standstill for some time, though the export business has been showing important increases.

The mining industry is looking for a steady improvement, and activities in relation to development would show a confident outlook in this respect. In British Columbia, Manitoba, and western Ontario work continues on an increasingly larger scale, which will bring some important properties into production during the present year.

The Western agricultural situation is a matter of constant study of ways and means to bring it to a more stabilized level, but, in the meanwhile, the Western agriculturist is bent on carrying on with ever-improving methods in the production of grain and livestock, having in view that ultimately his returns will justify confidence in Western Canada and its products. This is considered to be a reasonable attitude that will eventually realize greater value for farm products, more especially as the major effort is towards a higher standard that will meet export market requirements. This work is already showing results that further the belief that the correct course is being followed.

In Alberta and to some extent in Saskatchewan and Manitoba, drilling for oil and gas is to be continued. The Alberta programme is to be of considerable size, according to present indications, the more southern field getting the larger share of the proposed operations.

The sodium sulphate industry of Saskatchewan increased its production during 1933, and it is anticipated other deposits will be brought into operation during the present year. The clay areas of southern Saskatchewan continue to cause interest, awaiting further development at such time that capital and growing markets are available.

The fishing industry of the inland lakes of the three Prairie Provinces is being fully investigated in order that the marketing of the products of these lakes may possibly be put on a better footing, and efforts are being made to expand the marketable areas for whitefish, as well as for other classes of fish that are available in large quantities from the fresh water lakes of the West.

Report Finding Of King Solomon's Mine

Rhodesian Prospector Refuses To Give Exact Location

Findings of King Solomon's mine, search for which has caused the death of thousands has been reported by a prospector in Broken Hill, Northern Rhodesia. He declares that he discovered it while following a wounded buck, but refuses to give the exact location except that it is in the centre of a mine concession. For more than 300 years men have been searching for the legendary mine. In Solomon's day it was said to be so fabulously rich in gold that silver became of little value in his court. The search has gradually narrowed down to an area of about 250,000 square miles. Arabs tortured many natives in an effort to extract information about it, and many Portuguese tramped hundreds of miles in search of it.

For the first 11 weeks of this year and last year (figures for the latter within brackets), the numbers of livestock shipped from Western to Eastern Canada were: Hogs, 57,995 (78,234); cattle, 18,554 (59,211); calves 148 (19); and sheep, 25,932 (21,480).

An oyster egg is about one-five hundredth of an inch in diameter.

Saw Dreams Realized

Late Walter Wellman Made First Attempt To Fly Atlantic

The death of Walter Wellman in New York vividly recalled to others in Chicago the long, anxious days in 1906, 1909 and 1910, when they waited for news of the audacious attempts of the pioneer aviator to reach the north pole and to cross the Atlantic ocean in a lighter-than-air ship. Four times the audacious newspaper man tried to reach the north pole, twice on foot, twice by aircraft. He was the first man to attempt to cross the Atlantic by air. His aerial efforts were futile; accidents made them unsuccessful, but he lived to see the days when aircraft crossed both poles and when lighter and heavier than air craft spanned the Atlantic. His prophetic pioneering led the way.

Large Enough Anyway

Elephants as security were recently offered by an American showman, who asked for a government loan to rehabilitate his broken-down circus. The security he offered was a mortgage on three elephants.

Shortness of Breath
Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far, if the least exertion causes you to stop and get your breath, or if you have a weak, sinking feeling, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Marvels of the Human Eye
 By F. M. CROWE, Optometrist-Optician, Calgary

NO. 3—CATARACT

Much ignorance exists as to what a Cataract really is. A great many people think that a group of some kind on the outside of the eyeball which can be seen with the naked eye—but such is not the case.

A Cataract is that condition of the eye in which the Crystalline Lens has, from various causes, lost its normal transparency, thus preventing the rays of light from passing through it unaltered and focusing a clear image on the Retina. This loss of transparency usually progresses very slowly. Sometimes it starts from a single point or nucleus and gradually spreads until the entire Lens is involved at the same time. In the latter case it is very difficult, even for an expert with instruments, to recognize it in the early stages but as and when it continues to progress, the Lens becomes more and more cloudy, until finally the Retina becomes more difficult to observe (with instruments) and finally when the Cataract has become "ripe," the pupil instead of being "blue" is grey, which can be seen by anyone without the aid of instruments.

That condition then, in which the Lens has become cloudy is known as a Cataractous Lens or Cataract and glasses seldom offer much assistance. In fact, as conditions change, the Lens swells, necessitating frequent changes of the glasses worn till eventually the Lens having become so convex, the effect of the convex glasses formerly worn is neutralized and such people can read better with the aid of glasses without glasses than with those "second sight" originated. There is no such condition in normal life as "second sight" and such an apparent experience was due to the fact that the eye was not able, however, to make many people believe this. They insist in all sincerity that a relative lived to be over ninety years of age and could see to read without glasses although he formerly had to wear them, hence he must have got his "second sight". In the

first place such people have no means of knowing the percentage of normal vision such as relative possessed at the time of the "second sight" foundation for their belief is that the relative before death could see better without glasses than with them—the explanation of which I trust I have made clear. So don't you get your second sight!

Once a cataract has eyes simultaneously affected by unequal opacity appears in one Lens years in advance of the other but eventually both eyes become diseased. When the Cataracts have become "ripe" the patient has difficulty in distinguishing daylight from darkness and in proportion to the progress of the disease, dimness of vision follows for which glasses are of little or no avail. Patients see as if he were in a fog or as if a film was before the eyes. He usually has an urge to scratch his eyes but prefers a dark or cloudy day because he sees better and more comfortably. Cataracts do not cause any inflammatory condition to the eyeball.

Technically there are several varieties of cataracts—Senile. There is the Senile due to extreme old age but fortunately few very old people are afflicted. Injury to the eyeball at some time of life is a common cause while certain diseases of the body have a tendency to produce cataracts. Diabetes, for example. There is no medical exercise or other "cure" for Cataracts although much money and time, with resultant sorrow, have been spent by people who have fallen into the hands of the fakir (unfortunately by means of (teeth) who have prescribed cures with their nostrums to "special glasses." Surgery, performed by a skillful operator, when the Cataract is "ripe" is the only solution and when the opaque Crystalline Lens is removed especially from the eyeball and proper glasses applied, there is nothing to prevent the rays of light from passing into the eye and focussing on the Retina and very often one hundred per cent vision obtainable.

(To Be Continued)

Device Beats Stop-Watch

Claimed To Clock Athletes Within Hundreds Of Second

A device whereby, it is claimed, it will be possible to clock athletes within one hundredth of a second has been invented by Dr. E. L. Harrington, head of the department of physics at the University of Saskatchewan. It applies the principle of the electric clock.

The new timer is said to be 20 times more accurate than a stop-watch. It calls for a 12-toothed wheel, placed between magnets attached to Saskatchewan's electric power system. The alternating current of the system provides 120 impulses per second and the wheel would revolve 10 times a second. Each impulse moves a counter like a speedometer, attached to the wheel, which automatically records the time between two pressures on a clutch, it can be read within a tenth of a revolution.

Heretofore the physicist had used the machine in his laboratory to record the gradually decreasing energy of the radiations from radium.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile
Without Colalet

Your liver's a very small organ, but it certainly does a great deal. It filters 1,000 pounds of liquid blood from your body. You can't control it, but you can help it by taking salts, oil, mineral water, laetative candy or chewing gum, or roughage. When they're not strong enough, you may need a liver stimulant.

Carter's Little Liver Pills will soon bring back that sprightly life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25¢ at all druggists.

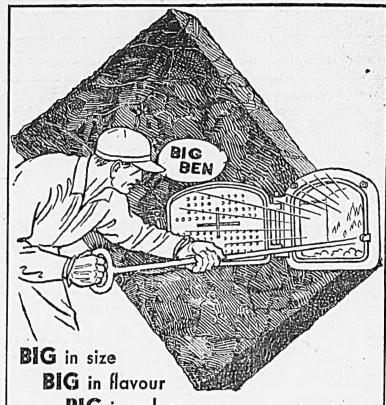

Increased Demand For Rubber

Modern Motor Cars Using More Than Ever Before

The yearly output of from 30 to 40 rubber trees is required to supply tires, tubes and parts for each modern car, according to American engineers. In 1928 the average car used about 3 lbs. of rubber parts in addition to the rubber in tires and tubes, while 1933 models carry from 30 lbs. to 60 lbs. of rubber parts. More than 90 per cent. of modern cars use at least 30 lbs. to 40 lbs. of rubber made up into 11 or 12 classes of parts, ranging from spark plug caps and door bumpers to torque spring insulators and engine mountings.

Of 18 swimmers, including nine women, who attempted to swim the English channel in the summer, only one, a woman, was successful.

European Travel Costs Lower

Reduced Railway Fares As Well As Hotel Rates

Contrary to a wide-spread impression, European travel costs this year, despite foreign exchange rates are actually lower than they were in the travel year of 1926, according to the Cunard & Anchor-Donaldson Lines.

This fact is revealed in the inclusive tour costs of the big travel agencies and the reduced fares on railways, automobiles and hotels. Private automobiles can be hired at a much lower price, the costs being reduced by 44% in Paris and in Rome by 46%, with comparative reductions in other countries.

Hotel rates average 36% less all over Europe than they were in 1926. In Paris the reduction is 33 1/2%, in London 21%, in Nice 26%, in Genoa 66%, Rome 50%, in Milan 60%, in Lucerne 33%, in Interlaken 40%, in Heidelberg 25%, in Cologne 35%, in Amsterdam 41%, and in Brussels 23%.

Railway fares have been lowered in many countries. In Holland, for instance, the reduction has been as much as 22%, in France 30%, in Poland 25%, in Switzerland 30%.

Taxis have come down considerably; in Amsterdam, for instance, a taxi ride, regardless of the distance covered, costs you only 27c, half as much as in 1926.

Organized sight-seeing tours in Europe are considerably reduced. In Paris, they are 25%, in Nice 28%, in London 14%, in Brussels 22%, in Rome 25%, and in Heidelberg 37% less than in 1926.

These reductions more than offset any unfavourable effect of high exchange operating in some countries.

To Assist Livestock Industry

Wants Reports On Detrimental Practices Of Livestock Buyers

To assist him in the presentation of the important information respecting the livestock industry to be submitted by joint representation of the government of the prairie provinces, Hon. W. C. Buckle, minister of agriculture for Saskatchewan, is desirous of having farmers interested in the production and marketing of livestock, report any specific example of where the producer is not the recipient of full market value for his livestock due to detrimental trade practices or other defect in the present system of marketing livestock. All statements should be accompanied by documentary proof. Opinions are valuable when based upon facts, but without them, are useless in a case of this kind.

It is expected that joint representations from the prairie provinces will be submitted to the Parliamentary Committee, Ottawa, very shortly. The Livestock Association and the Livestock Pool, associations have been invited to present available data to Hon. Mr. Buckle to be incorporated in a joint statement on behalf of the three prairie provinces.

Where News Travels Slowly

The Russian "Izvestia" reports that a Christmas message to the late Czar and his family was received in Leningrad the other day. It came from a Siberian tribe which had not yet heard of the Russian revolution.

Most Intelligent People

Dr. Rudolf Pintner, psychology professor at Columbia University, has found that persons born in January, February or March are inclined to be less intelligent than those born later in the year. He bases his conclusions on studies of 20,000 school children.

A Streamlined Bullet

War Office Experts Taking Keen Interest In Tests

A new streamlined bullet was tested on the Bisley ranges recently, in which war office experts are taking the keenest interest. Skilled riflemen showed that they could place nine on the target within two feet of each other at 1,000 yards and the wind had 25 per cent. less effect on the bullets than on the old-style bullets. The new bullet has a range of more than 5,000 yards as against the 3,000 yard range of the old bullet. It is made of a secret alloy.

W. N. U. 2041

OPTIONAL WIFE

EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, planning to live their own lives apart until Peter can earn enough to support them. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy oilman. She is short of money when she comes of age and so is studying commercial art in the hope of finding an agency job. Others in the story are Avis Werth, a wealthy woman who is trying to win Peter, Sylvia Todd, Peter's model, and Gisela Matson, his former roommate with whom he has quarreled. Avis is a bit of an excitable child, Peter, enterprising, Camilla, quaint with imperfections. When the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla sit on a bench by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This is the beginning of Camilla's troubles before the party that she and Peter are married. Bowman and Weeks, an advertising agency, where Camilla has submitted some of her work, are Peter's and Avis' employer. She has a new account which requires unusual treatment of Camilla's art. The critics were enthusiastic about her work, and Mr. Weeks offers her a salary of \$300 a week, to her and a prospect of having a doubt. She tells Peter of her good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and going to have the same as professional. Avis Werth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with her vivacity. She urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel.

(Now Go On With The Story)

CHAPTER XXXVIII.

She remained with him for another hour, striving to find the magic word or gesture that would break this spell of their disengagement, but he remained aloof and impersonal. This was an ecstatic hour of murmured endearments and close embraces, while they discussed their work and hopes and plans. There was no deeply poignant meeting of blue and brown eyes, eloquent with wordless meanings.

She might have been any girl who had stopped in and interrupted his work, any girl whom he would have entertained with desultory words and a not too gracious manner—except for the first ten minutes which had been followed by their ugly quarrel.

Their farewell was like an act in a play which they had rehearsed too many times to find exciting any more, and Camilla walked out into the warm autumn sunshine, seeing nothing, oblivious of sounds and feeling paralyzed. She avoided traffic by instinct and boarded the right car from habit. Nothing mattered.

Her world had turned upside down. She and Peter had said until words to each other, their eyes had avoided each other's in shame instead of meeting with sympathy. Somehow they had lost that precious, happy intimacy which had made any hope possible and every denial a promise. Her eyes stared out the window at the passing landscape. Buildings, houses, trees, lamp posts, were blurred like a photograph that was badly out of focus. No object was distinguishable.

When Camilla had gone, Peter sank into a chair and dropped his head into his hands. In his gesture was all the weariness and despair of his whole past. Never had life seemed so futile and ambition such a mockery. He might have known it would be like that, he told himself bitterly. Camilla had made practical use of her talent, and within a few weeks was offering to take care of him. He was a dreamer who couldn't even take care of himself.

He believed it was his pride that was hurt because he couldn't support the woman he loved, but it was just common human jealousy which gnawed in Peter's mind. Only the deadly poison of jealousy could so distort both love and pride. But the most malignant factor in jealousy is that it cannot be admitted, and therefore is difficult to cure.

The more Peter brooded over his situation, the more his anger grew, and his wrath settled upon Camilla because she was the object of his jealousy and of his overwhelming desire to succeed at the same time.

A light knocking at the door startled him violently, so deeply was he sunk into the absorbing quicksands of despair. He aroused himself with an effort and thought, "Camilla has come back to try to make it right. Well, she can't. I'm sick of it all."

The knocking was repeated, more imperative. He called crossly, "Come in."

The door opened and his hostile eyes met the pleasant greeting in Avis's.

"Hello, everyone," she called cheerfully, then stopped with an inquiring glance around the room. "Oh, I thought Camilla was here. I ran in to ask you both to have a little supper with me. I'm alone — and lonely." She laughed, without sincerity. " Didn't I hear her come in early this afternoon?"

"Yes, she was here," Peter replied tonelessly, and added, "but she had to leave early."

"Well, it's a good thing I came over in time to pull you out of your gloom. Another half hour and you would pass out." Her banter concealed her own suspicions of the situation and her good humor encouraged Peter. "All the more reason, then, why you should have supper with me, anyway. That's just one of the disadvantages of having a genius for a wife. Of course, she can't afford to spend all her time chirping up."

"Oh, I'm all right," he insisted, smoothing back the bright, disordered curls with a big, shapely hand. "Tired, I guess."

"Of course, you are. You've worked all day, haven't you? Come along."

He obeyed meekly. Following Avis across the hall had got to be something of a habit. Rather a pleasant habit, too.

Avis was a clever actress. To prove that she had anticipated—two guests for supper, she removed one of the plates from the table that was laid for three. She also talked easily and sparingly while she served Peter unobtrusively. Here was a "rift with the lot" of Peter's marriage, and she drove her wedge in cautiously. She restored his tranquility, made him comfortable and entertained him quietly. Just what he needed.

When they left the table, Avis suggested without insistence, "You surely don't need to work tonight. You should rest. Sit down and be comfy for awhile. Is your place almost finished?" She turned the volume low on the radio, and a sentimental voice crooned, "You take me to Paradise." Then she lit a cigarette and held it to his lips. He took it with an amused laugh. She fired another for herself and dropped down lightly on the opposite end of the divan, arranging the pillows for her comfort.

It was strange how Avis, served and pampered and indulged, found her greatest pleasure in serving and humoring this young giant who looked as if he had been made to struggle with physical force instead of molding bits of clay. The ignominy of love—that makes servants of parasites and weaklings of slaves.

She blew smoke into space, with contentment. "Yes, I'll finish this week. I had planned to have it bronzed before sending it to the exhibitor," pensive.

"Of course, you should. Why not?"

"That costs money," he replied, after a moment's hesitation, and met her glance defiantly. "So, I'll eat it as it is."

"Don't be absurd," she reproved him gently. "What's a little saving

like that, if it hurts your chance to win?"

"I can't save what I don't have,"

ingeniously.

"Well, wouldn't it pay you to borrow money on a chance like this? Besides, supposing that you don't win the prize, you can put it into marble and sell it as you suggested before."

He made a gesture of hopelessness.

"Who is going to loan me money to a fellow who has made a clay figure, on the chance that it will win him a prize or that he might copy it in marble and perhaps find a buyer for it?" That's all the collateral I have to offer. Did you ever hear of a financier who would take such a long chance as that?"

"A better guarantee would be your talent and ambition," she suggested.

He laughed ironically. "Who would believe that I had anything so valuable as that?"

"I know you have," she said, her gaze significantly.

"Oh—that!" he dismissed the implication of her words, instantly, and added presently, "Funny how women insist upon taking care of me. What's the matter with me, anyway?"

"Women?" Avis asked vaguely.

"Oh, Camilla and I just had a row about that this afternoon," he confessed bluntly. "She wanted me to let her help me with my money. Of course, she isn't making a fortune, but I guess she could spare a little. She thinks I should accept it, but what kind of a fellow wants his wife to keep him, even if he is trying to do something worthwhile? That wasn't in our agreement in the first place."

Avis exulted, but managed to keep her voice matter-of-fact and as impersonal as if she were answering Camilla herself when she said, "I think you are quite right about that, Peter. So many fellows are letting down on their pride these days, and allowing their wives to do it all. Of course you don't want to do that. I admire a man with some sand."

"Well, I have as much right to be independent as she has — and more. She wouldn't let me help her if she needed it, as things are with me now. Then why should I accept her money?"

"I think you are both right, under the circumstances. I see her point exactly—" Avis was chagrined, "—but I also see yours."

"I'm glad somebody does," he shrugged. "Well—that's that! What I think had better do is to get a good honest job and go to work at something that turns to gold at the magic touch of toll."

"At what?"

"That's it—what! And where? Jobs being the least plentiful thing in the world just now, that complicates the problem even better."

"Then don't be silly, Peter. Let me tell you something. Will you listen?"

"With both ears," he grinned.

"I'm beginning to believe the sup-

position is true that genuine artists haven't a grain of business sense, you being the first and best example I know."

"Is that all you have to tell me?"

I know that already," defiantly.

"Well, that's a good start. You admit the truth. Then, see here! Did you ever realize that no business success is ever founded on hope and ambition and, above all? Every success has to have a financial foundation. Yet of all the stupid people in the world, artists imagine that they are not self-made unless they starve and freeze and live absolutely independent of all the rest of the world. Is that sense?" she demanded.

"Put into words, it doesn't sound practical," Peter admitted. "But what else can you do? You think I should take my wife's money, then?"

"Absolutely not. No more than a man with a lot of pride would take his wife's money to go into business. But he would borrow money and sell stock for a foundation, and then set to work to make good. Your talent and your future are just as good risks as any business, and if you were as practical as you are artistic, you would borrow money to secure your peace of mind and a comfortable living, and then give yourself to your work. You owe that to yourself and Camilla."

Peter sighed. "I had hoped to make it alone."

"You are stubborn, aren't you?"

Avis smiled.

"All right, granting that you are right and my future is worth an investment, who else could be convinced?"

"No one else needs to be," she replied casually, intent with lighting another cigarette. "I have money to invest, and right now I don't know a safer place to put it in than in the career of Peter Anson, famous American sculptor of the future!"

BABY'S OWN TABLETS

Clearly Illustrated
"What is the difference between valor and discretion?"

"Well, to travel on an ocean liner without tipping would be valor."

"I see."

"And to come back on a different boat would be discretion."

Quick Relief Now From Neuralgia

JACK IN TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIFIC NEURALGIA... WHAT CAN I DO?

DO YOU HAVE TERRIFIC NEURALGIA? ASPIRIN, TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

2 LATER

WELL, JACK, I GOT THE ORDER! YES, IT'S A BIG ONE! I BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Quick Relief Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet dissolved.

The secret is due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two minutes after being taken. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, a tall, thin glass, shows an Aspirin Tablet starting to disintegrate almost instantly when you swallow it. And thus is ready to go to work almost instantly when you buy, then, be on guard when you take it. Be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST
Drop an Aspirin tablet in a glass of water. Note that it begins to dissolve almost instantly. And when it does in this glass it does in your stomach. Hence its fast action.

Quebec Dog Derby Thrills

Names to conjure with in the dog sled derby
world are now on the lists of drivers who will
contend for the premier honors of the Quebec Dog
Sled Derby to be staged in the Ancient Capital
on April 23rd and 24th. The 25th annual sled dog
rally number from LePere, Man., will again match
dogs, skillists and wits against his great rival
Leonhard Seppala, the Alaskan whose feats on the
trails are known the world over. St. Gobard and Seppala, who are now training at Laconia, N. H.,
will both meet strenuous competition from such famous mushers as Jack Diefelin, of Ottawa, Fred
Wheeler, of St. John's, Que., and Raymond Riss, of Orient, Ont. It is expected that the total entries will
run well over 100 teams.

The 120-mile classic is famous the world over, and followers of the great hearted dogs and gallant
drivers are arranging to make their headquarters at the Canadian Pacific Railway's Chateau Frontenac,
where special music, dancing and light-hearted gaiety will feature each evening. The Dog Sled Derby
is the most popular enthusiasm from European, United States and Canadian centers are this year more
than ever before making Quebec their winter playground. Skating, tobogganing, curling and skating
are among the popular activities under the direction of Jack Strathdee, winter sports director at the
Chateau Frontenac.

Oldtimers Leave District
Will Be Greatly Missed

Mr. and Mrs. J. W. Lawrence
and daughter Peggy left on Tues-
day for Red Deer, where they
will make their home in the future.
Mr. and Mrs. Lawrence will be
very much missed in the Chinook
district, as at all times they were
ready to give a helping hand in
connection with any community
affair. Mrs. Lawrence has been
president of the Chinook Womens
Institute for the past four years
and during that time took a very
keen interest in the work and
never missed being present at a
meeting.

Young Peoples Bridge
Club Holds Meeting

The Young Peoples Card
Club was held at the home of
Miss Madeline Otto on Monday
instead of Wed., as a
number wanted to attend the
show in Cereal on Wed. The
prize winners were Miss M.
Villigan and Irene McBeth.
The next meeting will be held in
the Chinook Cafe.

Mr. and Mrs. Wm. Vander
berg and family moved recent-
ly to Castor, Alberta, where they
will in future reside. It is
much regretted that Mr. Vander-
berg's are leaving this
district, as they are old timers
and have been good citizens in
every respect. The Advance joins
their many friends in wishing them prosperity in
their new home.

Annis Guss visited for a few
days with Naydaene Spindler,
of Cereal, and return Naydane
spent last week with Annis.

A large number of Chinook
people attended the show "Little
Women" in Cereal last night and
most reported enjoying it.

There has been a large num-
ber of farmers in town this
week getting seed wheat and
also feed for their horses.

Mr. I. H. Holden, editor of
Cereal Recorder was a pleasant
caller at the Advance office on
Tuesday.

Perhaps You Have
Forgotten that
Your Subscrip-
tion to The
Advance is due

If such is the case this will serve as
a gentle reminder. We admit that
payment of subscription accounts
gives us a delightful thrill and helps
fill some of the vacant nooks in the
old pocket-book.

Same with You--Farmer Found Dead
In Burning Granary

OYEN, April 3—A verdict of
suicide was returned by a coroners
jury at Cereal, Saturday evening,
at an inquest into the death of
Eric Wenzel, 24, Oyen farmer.

The charred remains of the de-
ceased man were discovered after
a blazing granary had been extin-
guished on the farm at Galtacres.
Evidence showed Wenzel had a
shotgun wound in the head when
recovered and it was shown de-
ceased had been partially para-
lyzed since the age of 12. He had
been despondent during the last
few days.

Dr. Eler was coroner, with the
following jury: F. A. Morrison,
William Walsh, Rufus Cates, W.
Byler, John A. McArthur, Harry
Charters, Doctor Dick.

The late Mr. Wenzel, formerly
of Leader, Saskatchewan, came to
Oyen a number of years ago. M.
J. Murphy, R.C.M. Police, was in
charge, and interment took place
in Oyen cemetery Tuesday.

A number of farmers in this
district have already started
seeding operations this week.
